

FLAGSTONE & SLABS

Gold Quartzite Flagstone

DESCRIPTION

Gold Quartzite glows with a vivid mix of honey, amber, and soft silver tones layered across a crystalline surface. Its fine shimmer and intricate texture catch the light naturally, highlighting subtle shifts in grain and hue. The overall impression is warm and dimensional—bright without being brash, and full of the quiet energy characteristic of true quartzite.

STONE THICKNESS:

1 1/2in - 2in, 3/4in minus, 2" minus
